Pierre Forcioli

FULL-STACK SOFTWARE ENGINEER

SUMMARY

I am a recent graduate in fullstack web development, able to adapt to both team and solo work. My experiences and studies have taught me to work largely independently, and to find and solve problems on my own. My activity as a Technical Coach during this last year has allowed me to acquire debugging skills that I would not have been able to acquire otherwise as the problems I had to solve were so varied!

MAIN SKILLS & TECHNOLOGIES

- **JavaScript, HTML, CSS, SCSS**
- **React JS, Node JS, Express**
- **MongoDB, MySQL**

- C, Python, Linux Systems

PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER

Holberton School France | Aug. 2021 - Present

- Technical support for the Students in their learning of the Holberton School's program
- Answering their questions and advising them on the best way to learn, according to their results
- Providing them with the best possible support, in a friendly and professional way
- Also technical point of contact for the Lille campus

STUDIES

HOLBERTON SCHOOL FRANCE

Specialization | Aug. 2021 - Jun. 2022

- Specialization in full-stack web development
- Creation of applications with different frameworks (ReactJS, Flask, etc...)

Foundations | Sep. 2020 - Jul. 2021

- Review of the basics already acquired in C language
- Learning of new languages (Python, JavaScript, etc...)
- Creation of group projects including an AirBnB Clone, and an instruction interpreter (use of project management software such as Trello and Slack)

SCHOOL 42

Classical Curriculum | Jul. 2018 - Sep. 2020

- Having never developed before, learning the basics of programming starting with C during an intensive one month exam phase, without interruption.
- Choice of a system-oriented curriculum (re-creation of functions like ls or printf, re-creation of a shell, etc...)
- Gamified learning of good programming methods and tools (mastering Git and GitHub, VSCode, Slack, etc.)
